RE: OFFSET OF AIR TRAVEL

Dear Guy

This letter is to formally inform you that Reef Ball Australia will offset, via My Clean Sky, all air travel conducted by its staff, taking effect as of today.

We thank you for your support and excellent service with the provision of carbon offsets for the concrete that we use to construct our artificial reef modules, and feel the next logical step is to offset air travel as many of our projects are overseas and require long distance flights.

As you know, many of our projects involve mitigating impacts/damage to coral reefs and we can no longer ignore the impact global warming is having on changing seawater pH and the effect this will have on marine life and reefs worldwide. Therefore we are proud to support your timely and crucial service and will encourage our partners to do the same.

Kind regards
